

# DONG TAM INDUSTRIAL ENGINEERING Ltd.

## Company overview

Established by enthusiastic members who have years of experience in surface preparation and industrial air pollution control, together with support from global partners - EU and USA, DTE has gradually established the brand-name by outstanding quality and attentive customer service.

## Products

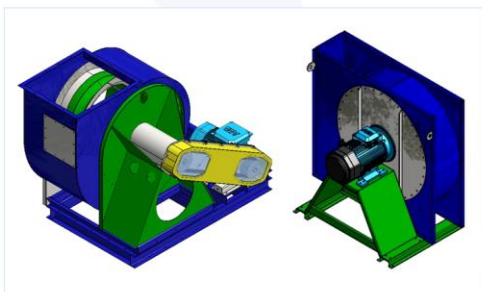

### Blasting room - Painting room

We design, manufacture and install European standard blasting - painting room which successfully achieve high effectiveness and efficiency. Also, unique ventilation system with Push-Pull technology is applied to ensure clean working environment and to minimize dust cloud in the room.

### Dust collector system

With our optimal-compact design, this system is easy to operate; also, its effectiveness is maximized while occupying small area.  
Filter lifetime is guaranteed to be more than 3000 hours.

### Eco-fan

Our high-performance fans consume *less 20-30%* energy than regular ones. Furthermore, self-cleaning impellers are made of heavy-duty steel sheet helping the fans to be more balanced. Eco fan is now preferred for most installations in industrial applications due to its low initial and low life-cycle cost benefits.

**DongTam thrives to bring our customers high quality products, cost-saving and eco-friendly solutions at a competitive price.**
